Michelangelo’s masterpiece is resurrected in this truly unique exhibition that focuses on the ceiling frescoes of the Sistine Chapel. Brought to life using a special photographic technique that reproduced the look and feel of the original paintings, visitors are given a chance to engage with the artwork in ways that were never before possible.

For the first time ever, visitors can explore the artwork at their own pace and admire the art from a distance that is physically impossible to achieve in the actual Sistine Chapel. This is an extraordinary opportunity to gain a new perspective on some of the most famous artwork in history. It also provides an incredible chance for inspiration as well as reflection on the purpose and meaning of the work.
